# NEW PSYCHOACTIVE SUBSTANCES

New psychoactive substances (NPS) (designer drugs, research chemicals, “legal highs”) have been emerging onto the recreational drug scene at an unprecedented rate. In parallel the number of substances notified to the Early Warning System (EWS) for the first time is increasing year on year;

2008: 13	2011: 49
2009: 24	2012: 73
2010: 41	2013: 81

Law enforcement, policy makers, scientists, clinicians, drug support workers and others actively working in this field are left floundering under the ingenuity of the market, and the speed at which it reacts. In general legislation has been effective in reducing use and availability of the controlled substance, but inadvertently spores a plethora of new compounds – the “substitution effect”.

As producers of designer drugs have become more creative, so have our methods for monitoring the emergence and usage of these substances. Since user reports are inherently unreliable and ingredients of “legal highs” are highly variable, analytically confirmed reports are critical for accurate information gathering. However, the availability of reference materials is frequently cited as a major challenge for those tasked with detection.

Chiron strive to meet customer demand for NPS reference materials, and work closely with clinical and forensic institutions to this effect. This mini-catalogue lists a wide range of standards for NPS and associated substances.

“

New psychoactive substance: a new narcotic or psychotropic drug, in pure form or in preparation, that is not controlled by the 1961 United Nations Single Convention on Narcotic Drugs or the 1971 United Nations Convention on Psychotropic Substances, but which may pose a public health threat comparable to that posed by substances listed in these conventions (Council Decision 2005/387/JHA). ”

**EMCDDA Definition**

**NOT FOR HUMAN CONSUMPTION**

# CONTENTS

Amphetamines	1-2
Methamphetamines	2-3
Methylenedioxymethamphetamine	3-4
2C Phenethylamines (psychedelics)	4
Benzofurans (APBs and APDBs)	4-5
Indanes	5
Cathinones	5-6
Piperazines	6-7
Synthetic cannabinoids (Spice)	7-12
Designer forms of pharmaceuticals	12
Methylphenidate related compounds	13
Benzodiazepines	13-14
Other pharmaceuticals	14-15
Synthetic opioids	15
GHB and GBL	15
Dissociatives	16
Aryl Cyclohexylamines	16
Tryptamines	16
Plant chemicals	16-17
Miscellaneous	17

## Amphetamines

Catalogue No.	Description (Abbreviation)	Cas No.	Concentration	Solvent	Volume
<b>Amphetamine</b>
